

Access hard-to-find healthcare data at scale — fast.

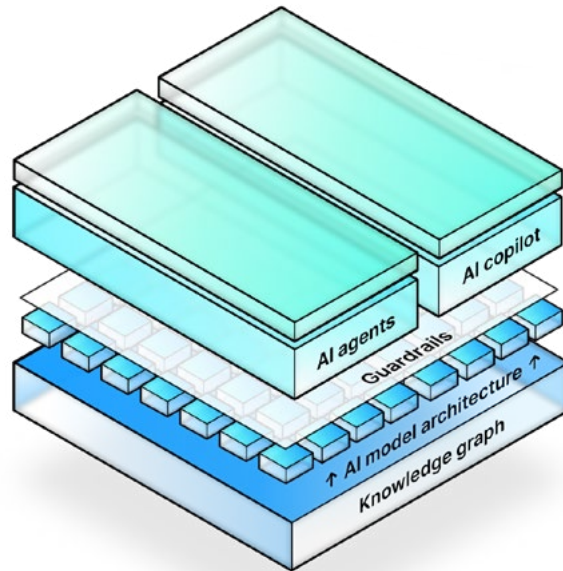

Getting patients with chronic conditions on, and staying on, treatment is more challenging today than ever before. Accessing administrative information essential to a patient’s journey continues to be a manual, time-consuming, and error-prone process, despite the prevalence of clearinghouse and eBV solutions. Without a way for providers and pharmaceutical services to quickly consume accurate information from payors across the ecosystem, patients will continue to experience delays in accessing life-saving and enhancing therapies.

Infinitus is the leader in automating traditionally phone-based workflows, supporting 44% of the Fortune 50. Through the combination of purpose-built AI models and a dynamic payor knowledge graph, customers are able to create time for their employees to enhance access, adherence, and affordability for patients.

Infinitus AI platform

With Infinitus, pharmaceutical manufacturers, payors, and providers can access hard-to-find information, fast at scale.

-  **AI agents**
End-to-end automation of payor data collection
-  **AI copilot**
AI-assisted calls to increase productivity

Key benefits

Data

Access up-to-date information

- ✓ Benefit from 1,400+ out-of-the-box payor connections
- ✓ 98% call success rate
- ✓ 10% higher data quality than manual approaches

Time

Save your team thousands of hours

- ✓ Automate revenue cycle workflows
- ✓ Augment employees or completely automate tasks
- ✓ 30+ minutes saved per patient case

Scale

Leverage secure, compliant, scalable enterprise-grade AI

- ✓ Millions of API and manual calls completed
- ✓ The industry’s most expansive set of guardrails
- ✓ HIPAA and SOC II compliant

Solutions

By payor type

- Medicare
- Commercial medical
- Pharmacy
